

ROLE: SAMPLER/CORE CUTTER – CLISBAKO PROJECT

Reporting to the Project Geologist or Senior Geologist, the Sampler comprises part of the team focused primarily on safe and efficient program execution through the sampling of drill core and rock samples.

Requirements

- Experience with core cutting or related activities in a mining or exploration context is an asset.
- Understanding of health and safety requirements as related to the role.
- Ability to walk in rugged terrain and to safely lift and carry objects up to 50 lbs weight
- Excellent attention to detail and a commitment to quality
- Authorized to work in Canada
- Valid BC Class 5 (or equivalent) driver's license
- Be able to travel to Nazko, BC for scheduled work rotations

Responsibilities

- Operate core saw in compliance with Equity and BMC health and safety systems
- Cut drill core samples in a safe and efficient manner.
- Follow proper sampling protocols
- Label and organize core samples according to established procedures.
- Collaborate with geologists to ensure that core samples are properly handled and preserved.
- Perform routine maintenance on core cutting equipment.
- Follow all safety protocols and guidelines.
- Participate in other geology-related activities as needed.
- Conduct regular inspections and maintenance of geotechnical equipment to ensure proper function and safety.
- Assist with other miscellaneous warehouse duties if work is completed in the core shack.

Additional Information

The pay range for this role is \$325 to \$375 per day, depending on experience. The rotation will be 7 days on, 7 days off or 14 days on, 14 days off (depending on the needs of the program). Accommodations and meals will be provided. The program is expected to commence mid-October and last for 1-2 months.
